

## **“A Training Handbook on Implementation of the 8<sup>th</sup> Five Year Plan” শীর্ষক**

খসড়া মতামত প্রদানঃ

8<sup>th</sup> Five Year Plan (8FYP) has emphasized on appropriate policies and institutions, and devised suitable development strategies for promoting prosperity, fostering inclusiveness, reducing poverty, and inequality. This plan sets to hit the target of 8.51 per cent GDP growth by FY 2025.

The 8FYP will also focus on timely implementation of all power and energy projects so as to optimize achieving the goals of Government’s energy sector strategy, whose key elements are:

- ✓ A rapid growth in electricity generation.
- ✓ Development of transmission and distribution system in line with generation.
- ✓ Mobilizing private and joint-venture investment in power sector.
- ✓ Diversification of primary fuel for electricity generation, with special focus in increasing renewable energy generation.
- ✓ As part of its pursuit of the strategy of least cost power generation, continue to have some highly
- ✓ efficient least polluting coal plants
- ✓ Improving power sector efficiency and reducing transmission and distribution losses.
- ✓ Use of alternative sources of energy.
- ✓ Use of nuclear energy for power generation.
- ✓ Exploring electricity-trading options with neighboring countries (India, Nepal, Bhutan and Myanmar).
- ✓ Use of alternative sources of financing (Export Credit Agency, etc.)

Sl.	8 <sup>th</sup> Five Year Plan Targets (quantitative or qualitative with page no.)	Base line (Year)35	Targets (2021)	Targets (2022)	Targets (2023)	Targets (2024)	Targets (2025)	SDG Goal/Targets	Cross-cutting Ministry /Division	Remarks (if any)
1	2	3	4	5	6	7	8	9	10	11
02	Use of alternative sources of energy (p-342)									Intensive Research and development is required for cost effective and affordable primary energy thru respective stakeholders consultation
14	The subsidy policy will need to be coordinated with pricing of energy products. (p.374)									EMRD may monitor energy pricing and proactive to any decision thru respective stakeholders consultation
15	Effective coordination mechanism to synchronize power and primary energy needs (p.376)									HCU being the SDG focal point of EMRD is already engaged in Integrated Power and Energy sector Master Plan also can coordinate effectively the Energy and Power Division

Sl.	8 <sup>th</sup> Five Year Plan Targets (quantitative or qualitative with page no.)	Base line (Year)35	Targets (2021)	Targets (2022)	Targets (2023)	Targets (2024)	Targets (2025)	SDG Goal/Tar gets	Cross-cutting Ministry/Di vision	Remarks (if any)
1	2	3	4	5	6	7	8	9	10	11
03.	Improve Energy Efficiency & Conservation through demand side management. (p-363)									Energy Efficiency & Conservation can be improved through demand side management such as using more energy efficient appliances, adopting co-generation, tri-generation where there is a scope.
06.	The Government on its part, will continue its emphasis on energy conservation by working on both supply and demand sides. (p-371)									Energy Efficiency & Conservation can be improved through demand side management such as emphasizing on more energy efficient appliances enforcing co-generation, tri-generation where applicable. On the other hand, energy conservation can be improved through supply side management such as providing prepaid gas meter to domestic customers, reducing system loss and giving financial incentives to the customers who are using energy efficient appliance.
